REVIEWED / 07 OCTOBER 2026

Final submission package

SYNCLAB - Centralized Workshop & Laboratory Allocation Platform
Group 01 / NANO2142 / Wayamba University of Sri Lanka

Read the root checklist first, followed by the compliance review. A-F follow the submission guide; G holds the newly prepared initial-stage supporting materials.

Code	Contents	Location
A1	5 main use cases + actors	A / 01
A2	Navigation, wireframes, final screens	A / 02
A3	ER, relational schema, SQL scripts	A / 03 + SQL
A4	Class, 2-page OOP note, 2 sequences	A / 04
B5	Original source snapshot and README	B / 05
B6	Windows bundle and build guide	B / 06
C7	CRUD, validation, filtering, report visual	C / 07
C8	5 executed queries and full outputs	C / 08
D9	10 test groups, logs and reproduction	D / 09
E10	12-page final report	E / 10
E11	3-page user manual	E / 11
F12	12-slide final PDF + editable PPTX	F / 12
F13	10-minute live demo plan	F / 13
G1	3-page proposal supporting document	G / 01
G2	5-minute initial overview PDF + PPTX	G / 02

Each top folder and deliverable wrapper is labeled SYNCLAB_Group_01. Section codes above refer to the letter and numbered wrapper. Technical source/runtime filenames remain intact so the application can build and load its dependencies.

SUBMISSION INDEX / 2

Verification and group actions

Completed technical evidence

Check	Observed result
Original source snapshot	73 files match original bytes
Production compilation	Qt 6.11.2 / MinGW 13.1.0 - success
Delivered executable startup	Own bundled Qt/MinGW/plugins loaded
Compiled integration tests	10 groups / 69 assertions / 0 failures
Further actual UI CRUD checks	19 assertions / 0 failures
Independent SQL checks	20 passed; integrity / foreign keys valid
Executed SQL reports	5 SELECT scripts with CSV/JSON outputs

Required group completion

Checklist items 16 and 19 remain unticked because the five member names, index numbers, actual contributions and named presenters are unverified. Enter the real leader name and obtain their signature on the top checklist. Confirm that every member participates in the final presentation.

Initial-stage status and timing

The proposal and five-minute deck are newly prepared on 07 October 2026. Earlier proposal submission and initial oral presentation have not been verified. The information sheet lists Week 14-15 and also says due Week 14; prepare for Week 14 and confirm the exact course date with the instructor.

SUBMISSION INDEX / 3

Open, run and reproduce

Launch the application

Extract the whole ZIP to a writable folder. Open B6 / Windows_x64 / Run_SYNCLAB_Group_01.cmd. The bundled database begins empty except for ten workshops. Source-build instructions and the active manifest are in B5 and the B6 guide.

Read the evidence

C7 shows actual application entry, validation, admin search/filter and update/delete evidence. Its screenshots folder also has a clearly labeled executed SQL report visual. C8 provides five query tables and the independent demonstration database. These reports are external submitted evidence; the app has no built-in report export.

Reproduce safely

Use C8 README instructions to reproduce SQL in a fresh output directory. D9 provides the C++ harness and source hashes. B6 / Packaging_Source records the production packaging manifest. All sample identities and bookings are fictional; keep them separate from operational data.

File lookup

SYNCLAB_Group_01_Artifact_Manifest.csv lists exact relative paths and sizes. Source, SQL, Qt and compiler dependency names remain unchanged where a tool requires them. Their enclosing submission wrappers and manifest identify the project/group.

Sources used for the review

Final Submission Package Guide.pdf; Final Submission Checklist.pdf; Group Software Development Project - Information Sheet.pdf; active program source and executed logs. Coverage describes supplied evidence, with no predicted assessment marks.

The prepared files support the submission. An actual oral presentation, member contribution declaration and leader signature must come from the group.
